Phone : +249925138799

My Profile : ahmedonour.netlify.app

Qualifications

- Excellent in turning designs to prototypes .
- Excellent knowledge in HTML , CSS , JAVASCRIPT.
- I am familiar with Typescript , React, React Native , Flutter.
- I start in the front end developing since early age (12 y/o), So I am expert.
- I write reusable code.
- I use git .
- I love to update designs and maintain it.
- I love Linux I am using it for years now.
- I sometimes do some designing.
- I am familiar with web hosting.
- I love to know about new tools to use. I am fast learner.
- I love team work, friendly.
- I am good at problem solving .
- I don't GIVE UP easily.
- I speak English and want to learn more languages.

Skills

The languages & Framework I used and still:

- HTML
- CSS
- JavaScript
- Typescript
- React
- React Native
- Flutter
- Python
- SQL
- SQLITE
- PHP.

The software I use:

- Vscode (with a lot of extensions).
- Spline (for 3D web animation).
- Git (version control).

- GIMP (for image manipulation).
- Adobe Photoshop (when I was using Windows os).
- I use Linux operating system.

My Work

I did those out of fun or for learning:

Roshan for real estates :

This was our graduation project , the idea of the website is to sell ,buy & rent property with out a broker , and make it just person-to-person operation , also to reduce the time and effort involved in the property search process.

I used **EJS , CSS & JavaScript** for the front-end , and **NodeJS , ExpressJS & SQLite3** , for the back-end, I couldn't deploy it because it cost but, this is the repo: <https://github.com/ahmedonour/roshan>

Your Dream Home is in Your Hand

You have no time to search for a home but still thinking about time you will lose in searching for your dream home don't worry you are in the right place

Get Start

Product card preview :

I developed this card for a challenge , frontend-mentor , It's a nice platform for front end development challenges, there I submitted my solution .

I used only **HTML & CSS** for it , and flex box to organize the content.

Besso-art & Sondos-bookshop:

I developed this two for my friends in college , we had an assignment , It was building a one page using **HTML & CSS** , I volunteer to do my friends pages, because I wanted to practice, and I had so much fun building them, it wasn't fancy , but i love them.

Sondos-bookshop screenshot :

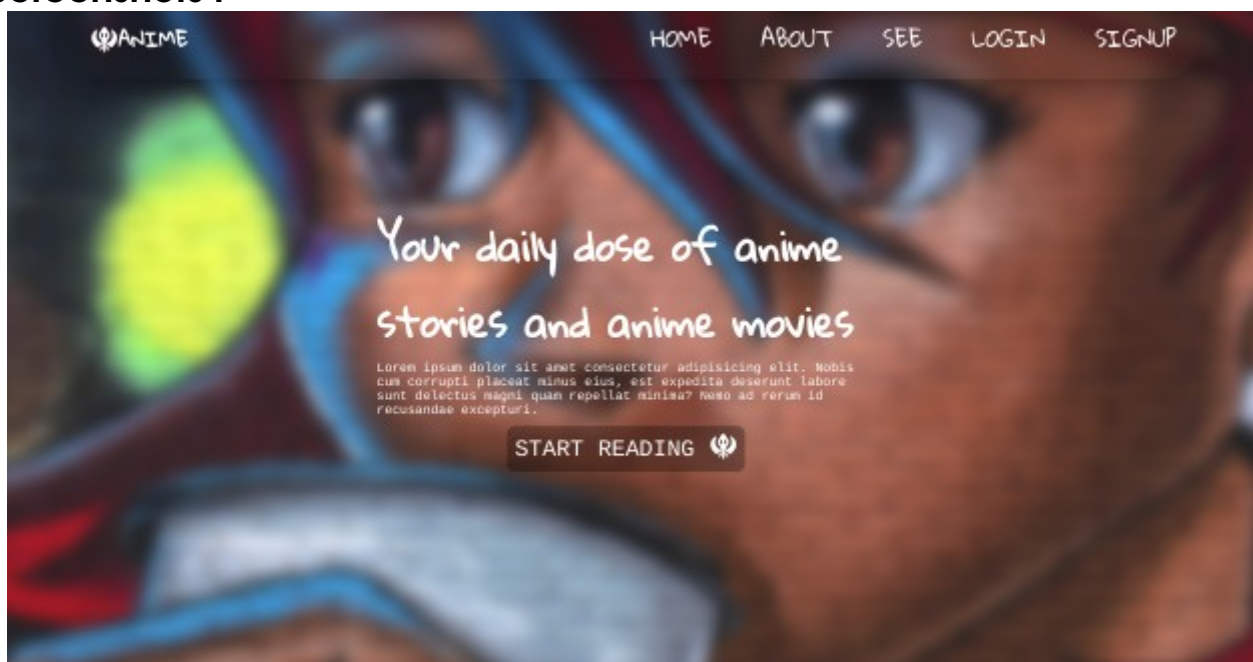

Anime for anime stories :

I don't love anime, but a lot of my colleagues addicted to anime, So i thought , why we don't make an app for the to schedule their anime . I used only **HTML & CSS and responsive layout**.

About me

I am 22 y/o , I am from Sudan,I live in Khartoum ,I graduate from college newly , my speciality is IT, I didn't love the IT because it wasn't what I expect, so i was dedicated to have more knowledge in front-end development , Studied at the University of Karary , Khartoum, Sudan.

This field (front-end development) started to draw my attention when I was 12 y/o, I used to explore the internet, so I asked my self how it work's? and who make the web pages? ,And how? So I asked my father and he didn't know , but he gave me a book called Creating Commercial Web sites by Kim & Brad Hampton, from their I started my journey .
