Skills

The languages & Framework I used and still:
- HTML
- CSS
- JavaScript
- Typescript
- React
- React Native
- Flutter
- Python
- SQL
- SQLITE
- PHP.

The software I use:
- Vscode (with a lot of extensions).
- Spline (for 3D web animation).
- Git (version control).
- GIMP (for image manipulation).

- Adobe Photoshop (when I was using Windows os).
- I use Linux operating system.

About me

I am 22 y/o , I am from Sudan,I live in Khartoum ,I graduate from college newly , my speciality is IT, I didn't love the IT because it wasn't what I expect, so i was dedicated to have more knowledge in front-end development , Studied at the University of Karary , Khartoum, Sudan.

This field (front-end development) started to draw my attention when I was 12 y/o, I used to explore the internet, so I asked my self how it work's? and who make the web pages? ,And how? So I asked my father and he didn't know , but he gave me a book called Creating Commercial Web sites by Kim & Brad Hampton, from their I started my journey .
